

6A He Wen Bei (Writing 4)

There are lot of problems in Africa. People living in Africa are poor. Africa is dry and unsanitary. Natural disasters often occur there, and people often get sick. They can't live comfortably.

Africa is dry so the plants there can't survive. African are worried about this. The food there is very expensive, and the people are very poor. They can't afford that food. The pond there is dirty. People use that water for washing clothes.

Africa is short of water, so they can only drink water from ponds. This will make a lot of people sick. However, the education there is also very poor. The child cannot read. The classrooms are small. The facilities were not perfect either.

To help the people in Africa, we can donate money. We can donate second-hand clothes and books. We can also help them by selling flags.
